Experience

The Harry Fox Agency, Inc.

Lead Developer | New York, NY

March 2014- Present

- Software Engineer responsible for migrating existing business and building new applications in a PHP/MySQL platform hosted on Amazon Web Services.
- Coordinating with Business Analysts to ensure that technical requirements are met in a timely fashion and assigning developers to complete them.
- Front-End Development for all HFA websites including harryfox.com, hfaslingshot.com, songfile.com, and various opt-in portals for the National Music Publishers' Association.
- Big Data analysis and ingestion of millions of usage lines reported by various Digital Service Providers and YouTube Multi-Channel Networks.
- Maintaining and updating the HFA Database of Record, the world's most complete collection of Songs, Master Recordings, Publisher Splits, and Catalog Hierarchy.
- Digital Sales Report creation for streaming services in XML format that adheres to strict guidelines provided by DDEX.
- Royalty calculations, invoices, tax forms, and check runs for all clients to make sure that songwriters are paid properly for the use of their works.

General Assembly
